We believe that presenting EBITDA and EBITDA margin is useful to investors because they provide important information concerning our operating performance exclusive of certain non-cash and other costs. EBITDA and EBITDA margin demonstrate our ability to execute our financial strategy, which includes reinvesting in existing capital assets to ensure a high level of customer service, investing in capital assets to facilitate growth in our customer base and services provided, maintaining our investment grade credit ratings and minimizing debt, paying cash dividends, repurchasing our common stock, and maintaining and improving our market position through business optimization. Although depreciation, depletion, amortization and accretion are considered operating costs in accordance with U.S. GAAP, they represent the allocation of non-cash costs generally associated with long-lived assets acquired or constructed in prior years.

We believe that presenting adjusted EBITDA and adjusted EBITDA margin, adjusted EBITDA margin by business type, adjusted pre-tax income, adjusted tax impact, adjusted net income - Republic, and adjusted diluted earnings per share provide an understanding of operational activities before the financial impact of certain items. We use these measures, and believe investors will find them helpful, in understanding the ongoing performance of our operations separate from items that have a disproportionate impact on our results for a particular period. We have incurred comparable charges, costs and recoveries in prior periods, and similar types of adjustments can reasonably be expected to be recorded in future periods.

*Gain on extinguishment of debt and other related costs, net.* During the year ended December 31, 2024, we recognized a loss of \$2 million due to the amendment and restatement of our credit facility. Additionally, we recorded a net gain of \$8 million during the year ended December 31, 2024, attributable to the early settlement of certain cash flow hedges related to the term loan facility. The gain was recognized as a reduction of interest expense. During the year ended December 31, 2023, we incurred a loss on the early extinguishment of debt related to the early repayment of a portion of our term loan facility. We incurred non-cash charges related to the proportional share of unamortized deferred issuance costs of less than \$1 million.

*Restructuring charges.* During the three months and year ended December 31, 2024, we incurred restructuring charges of \$9 million and \$29 million, respectively, and during the three months and year ended December 31, 2023, we incurred restructuring charges of \$6 million and \$33 million, respectively. The 2024 charges primarily related to the redesign of our asset management, and customer and order management software systems. Of the 2023 charges, \$9 million related to the early termination of certain leases and \$24 million related to the redesign of our asset management, and customer and order management software systems. During the year ended December 31, 2024 and 2023, we paid \$25 million and \$39 million, respectively, related to these restructuring efforts.

*Gain on certain divestitures and impairments, net.* During the three months and year ended December 31, 2024, we recorded a net gain on certain divestitures and impairments of \$29 million and \$30 million, respectively, of which \$29 million was due to a gain on sale of a transfer station facility and \$1 million related to a gain on business divestitures and impairments. The settlement included a combination of lump-sum payments to participants who elected to receive them and the transfer of benefit obligations to a third-party insurance company under a group annuity contract. As a result of the settlements, we recognized a non-cash gain of \$8 million during the year ended December 31, 2024, related to the accelerated recognition of the unamortized net actuarial gains in accumulated other comprehensive loss.

*US Ecology, Inc. acquisition integration and deal costs.* During the three months and year ended December 31, 2023, we incurred acquisition integration and deal costs of \$9 million and \$34 million, respectively, in connection with the acquisition of US Ecology, Inc, which included certain costs to integrate the business.
