(1) The income tax effect related to our adjustments includes both current and deferred income tax impact and is individually calculated based on the statutory rates applicable to each adjustment.

(2) The aggregate impact to adjusted diluted earnings per share totals to less than \$0.01 for the three months ended September 30, 2024.

(3) The aggregate impact to adjusted diluted earnings per share totals to less than \$0.01 for the nine months ended September 30, 2024.

We believe that presenting EBITDA and EBITDA margin is useful to investors because they provide important information concerning our operating performance exclusive of certain non-cash and other costs. EBITDA and EBITDA margin demonstrate our ability to execute our financial strategy, which includes reinvesting in existing capital assets to ensure a high level of customer service, investing in capital assets to facilitate growth in our customer base and services provided, maintaining our investment grade credit ratings and minimizing debt, paying cash dividends, repurchasing our common stock, and maintaining and improving our market position through business optimization. Although depreciation, depletion, amortization and accretion are considered operating costs in accordance with U.S. GAAP, they represent the allocation of non-cash costs generally associated with long-lived assets acquired or constructed in prior years.

We believe that presenting adjusted EBITDA and adjusted EBITDA margin, adjusted EBITDA margin by business type, adjusted pre-tax income, adjusted tax impact, adjusted net income - Republic, and adjusted diluted earnings per share provide an understanding of operational activities before the financial impact of certain items. We use these measures, and believe investors will find them helpful, in understanding the ongoing performance of our operations separate from items that have a disproportionate impact on our results for a particular period. We have incurred comparable charges, costs and recoveries in prior periods, and similar types of adjustments can reasonably be expected to be recorded in future periods.

Restructuring charges. During the three and nine months ended September 30, 2025, we incurred restructuring charges of \$3 million and \$13 million, respectively, and during the three and nine months ended September 30, 2024, we incurred restructuring charges of \$8 million and \$20 million, respectively. The 2025 charges primarily related to the design and implementation of a new accounts receivable system. The 2024 charges primarily

related to the redesign of our asset management, and customer and order management software systems. During the nine months ended September 30, 2025 and 2024, we paid \$10 million and \$18 million, respectively, related to these restructuring efforts.

Labor disruption. During the three and nine months ended September 30, 2025, we experienced labor disruptions in certain isolated markets. The impact of these labor disruptions during both the three and nine months ended September 30, 2025 was \$56 million, including \$16 million of customer credits and \$40 million of cost of operations.

Adjusted Free Cash Flow

The following table calculates our adjusted free cash flow, which is not a measure determined in accordance with U.S. GAAP, for the nine months ended September 30, 2025 and 2024 (in millions of dollars):

	Nine Months Ended September 30,	
	2025	2024
Cash provided by operating activities	\$ 3,315	\$ 2,914
Property and equipment received	(1,183)	(1,199)
Proceeds from sales of property and equipment	10	9
Restructuring payments, net of tax	7	14
Labor disruption, net of tax	42	—
Cash tax benefit for debt extinguishment and other related costs	—	(1)
Adjusted free cash flow	<u>\$ 2,191</u>	<u>\$ 1,737</u>

We believe that presenting adjusted free cash flow provides useful information regarding our recurring cash provided by operating activities after certain expenditures or recoveries. It also demonstrates our ability to execute our financial strategy and is a key metric we use to determine compensation. The presentation of adjusted free cash flow has material limitations. Adjusted free cash flow does not represent our cash flow available for discretionary payments because it excludes certain payments that are required or to which we have committed, such as debt service requirements and dividend payments.

Purchases of property and equipment as reflected on our consolidated statements of cash flows represent amounts paid during the period for such expenditures. A reconciliation of property and equipment expenditures reflected on our consolidated statements of cash flows to property and equipment received during the period follows for the nine months ended September 30, 2025 and 2024 (in millions of dollars):

	Nine Months Ended September 30,	
	2025	2024
Purchases of property and equipment per the unaudited consolidated statements of cash flows	\$ 1,310	\$ 1,357
Adjustments for property and equipment received in a different period	(127)	(158)
Property and equipment received during the period	<u>\$ 1,183</u>	<u>\$ 1,199</u>

The adjustments noted above do not affect our net change in cash, cash equivalents, restricted cash and restricted cash equivalents as reflected in our consolidated statements of cash flows.

ACCOUNTS RECEIVABLE

As of September 30, 2025 and December 31, 2024, accounts receivable were \$1,900 million and \$1,821 million, net of allowance for doubtful accounts of \$70 million and \$74 million, respectively, resulting in days sales outstanding of 41.0, or 30.2 days net of deferred revenue, compared to 40.9, or 30.0 days net of deferred revenue, respectively.

CASH DIVIDENDS

In July 2025, we paid a cash dividend of \$182 million to shareholders of record as of July 2, 2025. As of September 30, 2025, we recorded a quarterly dividend payable of \$194 million to shareholders of record at the close of business on October 2, 2025, which was paid on October 15, 2025.

SHARE REPURCHASE PROGRAM

During the three months ended September 30, 2025, we repurchased 2.3 million shares of our common stock for \$539 million at a weighted average cost per share of \$232.00. As of September 30, 2025, the remaining authorized purchase capacity under our October 2023 repurchase program was approximately \$1.9 billion.
