

2018 Republic Services Sustainability Reporting Addendum

September 23, 2019

On July 30, 2019, Republic Services' 2030 Climate Leadership goal was approved by the Science Based Targets initiative (SBTi). This goal focuses on greenhouse gas reduction, and was approved by SBTi as follows:

*Republic Services commits to reduce absolute total Scope 1 and 2 GHG emissions 35% by 2030 from a 2017 baseline year**

** The target boundary includes biogenic emissions from biogenic feedstocks.*

We are proud to share that our target is consistent with the level of decarbonization required to keep global temperature increase to well-below 2°C (3.6°F) compared to preindustrial temperatures.

SBTi is a collaboration between the CDP, United Nations Global Compact (UNGC), World Resources Institute (WRI), and World Wildlife Fund for Nature (WWF). The initiative champions science-based targets as a powerful way to boost companies' competitive advantage in the transition to the low-carbon economy.

To learn more about our commitment and science-based targets, visit the following sites:
